COMPANY PROFILE

Aircraft Marketing, Ltd. (AML) is a select group of aircraft professionals experienced in the turbine powered fixed and rotary wing aircraft brokerage and sales business with headquarters in Las Vegas, Nevada, USA. AML was founded in August 1983 and is a member in good standing of the National Business Aircraft Association (NBAA), the International Society of Transport Aircraft Trading (ISTAT), and the Helicopter Association International (HAI).

AML provides access to an extensive international network of skilled personnel in all technical and financial aspects of the aircraft industry. The combined knowledge of the AML team provides our clients with the complex and detailed information necessary to make proper decisions in acquisition and sales of an aircraft. AML continually exposes its technical and sales personnel to data affecting the constantly changing turbine powered aircraft marketplace. In addition, AML maintains close communication with manufacturers' technical departments as well as the Federal Aviation Administration (FAA) and aviation authorities of various other countries to stay fully informed regarding recent aircraft service bulletins, airworthiness directives, best maintenance practices, regulations, and performance data. With such a well-trained and fully informed sales, marketing and research teams, AML can assure its clients that the numerous complexities associated with the sale or purchase of an aircraft will be fully met, allowing the client to feel confident they are achieving the highest and best value in any transaction. AML has consistently earned its reputation with more than 32 years of unmatched integrity and expertise in the industry worldwide.

AML works with the client's tax professionals including structuring of Tax Deferred Like-Kind Exchanges. Through a Tax Deferred Exchange, the aircraft is traded through our books or via a qualified intermediary as a partial payment trade-in towards the purchase of replacement aircraft. By using the Tax Deferred Exchange, the client's beginning basis to start tax depreciation of the newly acquired aircraft will be the purchase price of the newly acquired aircraft less the amount of the tax deferred gain (value given for traded-in aircraft). In addition to our qualified research department, a computerized marketing and research system allows AML to target potential buyers or sellers of business and commercial aircraft of all kinds. AML research department is regularly in contact with aircraft owners and operators worldwide, providing timely important data on the overall aviation market conditions.

COMPANY KEY PEOPLE

Louis J. Kaminsky, President

Lou founded Aircraft Marketing, Ltd. in 1983 after more than 5 years as a sales representative for another well-known aircraft brokerage entity. He has over thirty-eight years of experience in the aviation business and has acquired keen insight into the tax issues, deal structuring and contracting, and the business and negotiating aspects of the aircraft industry. He has acted in several instances as a court qualified expert in valuation matters involving aircraft of various kinds in litigation both in the USA and in Sweden. In addition, Lou has had exposure in his early educational process to government when he served as a page and later as a legislative aide to a United States Congressman. As a result of the many personal relationships Lou has developed over his career, both domestically as well as in the international aviation realm, AML has established its reputation as a leader in the industry.

COMPANY SERVICES

We provide Exclusive Sales Agent services for aircraft owners in marketing aircraft worldwide. We are experts in turbine engine fixed and rotary wing aircraft sales and will help you acquire or sell your ideal aircraft.

SALES:

As your exclusive sale agent, we provide market analysis from our specialist research department to provide the aircraft owner a list of competing aircraft for sale, their specifications and their asking prices.

This will help the owner establish with us a realistic current fair market retail value of their aircraft and corresponding asking price. As exclusive sales agent, our efforts include aircraft advertising in specialized publications and sites, and distribution of aircraft details to our clients, partners and to other brokers worldwide.

Our sales and research departments conduct targeted sales calls and direct mailings to aircraft owners and operators of the make and model of the listed aircraft and to other aircraft types that we target as candidates for the potential purchase of the listed aircraft. Eighty percent of used executive aircraft purchases are purchased by entities that already own aircraft.

AML coordinates all aspects of the transaction with the owner including aircraft sales agreement, tax and customs matters, preliminary and pre purchase inspections, aircraft delivery, and closing. Specializing in deal – transaction structuring to maximize tax advantages of aircraft transactions such as I.R.S Section 1031 Tax Deferred Like Kind Exchanges.

ACQUISITIONS:

We provide Purchasing Agent and Consulting services, assisting customers with the selection of an aircraft type best suited to the mission and budget.

AML coordinates everything from aircraft cost analysis and comparisons, market analysis, assisting in the construction of and negotiating of the aircraft purchase contract, matters related to sales, and other tax issues, preliminary and pre purchase inspections, aircraft delivery, and closing.

If requested, we can provide crew selection and training.

APPRAISALS:

We are qualified and can be engaged to provide both desktop appraisals and appraisals after and on-site physical inspection of the aircraft and its records.

We provide appraisals for past, present, and future values.

MAINTENANCE MANAGEMENT AND PRE-PURCHASE INSPECTION SERVICES:

Our maintenance management and or pre-purchase inspection services begin with review of the aircraft specifications and maintenance tracking reports to assist the client in the development of an appropriate work scope for the Pre-Purchase Inspection (PPI) or for the maintenance management of an existing aircraft.

Our recommended PPI work scope might incorporate suggestions to expand the work scope beyond the usual and customary PPI work scope suggested by the manufacturers or by the PPI facility engaged to conduct the PPI. We shall have the PPI Facility issue a lead-time, down time and cost quotation for final PPI work scope selected by the client to be included as an exhibit by the client in their pre-owned aircraft purchase agreement.

Our PPI services include having our representative on board the aircraft to participate in any aircraft repositioning flights and aircraft PPI test flights at which time we will also test the aircraft cockpit and cabin systems to verify that they are as represented, that they are functional and operative and the documentation related to them is complete and meets requirements.

We monitor and review on a daily basis the Pre-Purchase Inspection findings including those of the aircraft records audit and physical inspection of the aircraft, its engines and APU to ensure when the aircraft is returned to service by PPI Facility that the aircraft at delivery will meet the condition specified in the client's pre-owned Aircraft Purchase Agreement.

We provide frequent written reports to client describing any aircraft documentation and records defects and discrepancies, and any physical defects and discrepancies discovered by our team and or found by the PPI Facility. We will classify the defects identified and shall coordinate with client recommended disposition of the discrepancies.

In addition, providing Systems Integrator actions that may include coordinator of airframe and engine inspections and avionics upgrades, cabin refurbishment and initial completions. To allow the client to have one professional source contracting and management for various functions of completions, upgrades and crew training.

MANAGEMENT OF INTERIOR COMPLETIONS & REFURBISHMENTS:

Our new aircraft completion management capabilities start with a customized strategy to meet your requirements and continues through customer aircraft acceptance process until final customer delivery.

We will assist in developing your custom specifications and our specialists will work with best interior designer and technical centers for completion of your aircraft or modification of your existing aircraft.

Our on-site supervision will be available to managing day to day affairs of your aircraft completion or modification.

Our existing aircraft or newly acquired pre-owned aircraft interior refurbishment management capabilities adopt a conservative and proactive approach adapted to keep our customers flying their existing or newly acquired aircraft longer, including cost effective measures for upgrading platforms of interior refurbishment, paint, and cabin entertainment and communication systems, etc.
